## WELD-ON<sup>®</sup>

IPS CORPORATION

The era of plastic piping in the United States began in 1954 with the introduction of Weld-On<sup>®</sup> PVC 710<sup>™</sup>, America's first plastic pipe cement. Through the 1960's, IPS Corporation introduced several other PVC, transition and ABS cements, cleaners and primers. Today, Weld-On offers the widest range of solvent cements for plumbing, industrial grade pipe and fittings up to 30". Weld-On formulations are all low-VOC, all the time.

## GUY GRAY<sup>™</sup>

IPS CORPORATION

Beginning with the industry's first washing machine outlet box in 1958, the Guy Gray<sup>™</sup> line has evolved into a broad line of high-quality products, including FR-12 Fire-rated Boxes, Stainless Steel, White Powder Coated, Dual Drain, Dishwasher, Dryer, Gas, Coffee Maker and Dialysis Outlet Boxes. The initial offering of domestic valves now includes Single Lever, Quarter-turn and Hammer Arrestor Valves with Solder, F1807, CPVC and other connections.

## WATER-TITE

IPS CORPORATION

In 1969, Water-Tite standardized laundry connections with the first plastic Washing Machine Recessed Outlet Box. In 1978, IPS Corporation's reputation as industry innovators expanded with the first recessed Ice Maker Outlet Box. Labor-saving products also include the 3 N 1<sup>™</sup> Multi-Size Roof Flashing, Right Strap<sup>™</sup> Multi-Functional Clamp, Single Shot Insulating Clamp, Techno Flange<sup>®</sup>, Angle Stop Boxes and Dimple Valve, and Stabilizer Support System. Today, the Water-Tite product line offers a wide range of plastic labor-saving specialty plumbing products.

## ROOF TOP BLOX<sup>®</sup>

IPS CORPORATION

The Roof Top Blox<sup>®</sup> is a revolutionary roof top support block system that works with height extension rods, support brackets, pipe rollers, strut, and more. The Blox is versatile enough for every roof plumbing support, roof piping support, and roof platform support need. In addition, the packaging makes transporting roof support blocks to the job – and roof top – a faster and more efficient process. Engineered with contractors in mind, the Roof Top Blox system is designed to be quickly installed, expanded, and adjusted from just the top side. Easier installation and lasting dependability make Roof Top Blox the best roof block choice to specify or install for supporting pipes and mechanical equipment on flat commercial roofs.

The Test-Tite® brand has over 40 years of experience in manufacturing a complete line of pneumatic and mechanical test plugs. Our full line of pneumatic test plugs include standard, multi-size, cleanout, long and bypass pneumatic plugs for use in residential, commercial and underground markets.

Pneumatic plugs, up to 15" diameter, come standard with a Pressure Relief Valve – the first full line of Pressure Relief Plugs in the Plumbing industry. Our pneumatic plugs come standard with a heavy wall thickness which allows us to offer a 3 year warranty. Our full line of mechanical test plugs include Twist-

Tite wing nut test plugs, T-Cone Cleanout and Repair Plugs, Twist 'N Seal®, Flush Cleanout Repair Plugs, and the all new Mechanical Cleanout Test Plug.

Since 1931, the AB&A™ product family has grown to include a full line of plastic and brass bath wastes, plastic, cast-iron and brass plumbing drains and fittings, cleanouts and associated accessories. Easy-to-install AB&A bath wastes are offered in an assortment of special finishes to complement today's designs and customer preferences. A wide range of lavatory, floor and shower drains are available in plastic, bronze or cast brass. Recognized for consistent high quality, AB&A products are used in both new construction and retrofit markets.

In 1970, Studor's founder, Sture Ericson, developed Air Admittance Valve (AAV) technology, which was brought to the United States in 1986. Today, Studor® remains the only specialized AAV manufacturer in the world, with millions of valves successfully installed in North America and worldwide. Studor has pioneered AAV technology since its introduction in the USA. Accordingly, AAVs are commonly referred to as "Studor vents" – the brand name in the industry.

The expertise in designing plumbing systems by Studor engineers is unmatched. Remember, "It's not a Studor valve unless it says so!"

The Truebro line consists of protective undersink pipe covers and plumbing enclosures for ADA compliance in handicap-accessible lavatories and sinks – for both new construction and retrofit markets. The Lav Guard® 2, Lav Shield®, Basin Guard®, and Soft Guard Plus™ are professional ADA-mandated protection systems designed for durability, aesthetics, and sanitary installations. The Lav Guard® 2 series of undersink pipe wraps offer E-Z Tear to Fit and built-in fasteners for fast, easy installation. Lav Shield® is an attractive, designer-style, tamper-resistant ADA-engineered protective lavatory enclosure. Basin Guard® is a clean and durable design for ADA-compliance in lavatories installed into countertops.

## The leading edge of product innovation

### Water-Tite MultiBox™ System

Water-Tite's MultiBox™ System can be installed in multiple configurations, with numerous valve options, for the most stringent design specifications. As a single-box washing machine outlet box system, with top mount valves, to a three-box washing machine system including a Studor® Air Admittance Valve, the MultiBox is the most versatile and robust choice of contractors.

- **Integrated mounting options: mounting flanges, stabilizer bar slots or nail slots**
- **Nine valve knockouts and two drain knockouts**
- **Raised drip guards on top and bottom captures hose leaks**
- **Forged brass valves provide superior strength with an anti-rotational design for securement**
- **All MultiBox faceplates fit any box configuration, including fire-rated; and fit up to two sheets of 5/8" drywall**
- **Auxiliary drain box accommodates water softener drain adapter or condensate drain adapter**
- **Full product listing starts on page 78**

### Water-Tite Single Shot® Clamps

The new and improved Single Shot® Insulating Suspension Clamp now offers the Plumbing Professional more easy-to-install options! First, a new key-hole closure assists in the prehanging of pipe – the installer can pre-set the Single Shot® to the joist, slide the pipe into the clamp, and then set the nail. Alternatively, the installer may slide the pipe into the Single Shot®, then simply nail it into the joist. Second, a new stabilizing foot allows the clamp to rest against the joist to eliminate rocking or movement of the clamp and pipe.

- **Available in 1/2", 3/4" and 1" CTS sizes**
- **Supports all CTS tubing**
- **Reduces inventory and installation times**
- **Preloaded nail saves installation time and reduces job costs**
- **Full product listing on page 97**

## Test-Tite® Pressure Relief Pneumatic Test Plugs

Test-Tite® now offers a totally redesigned series of pneumatic test plugs (1 1/2" - 4") with pressure relief valves. The built-in valve releases excess pressure above recommended inflation pressure, reducing the risk of over-inflation when testing or temporarily blocking DWV systems. Relieved air pressure exhausts through top of plug – not into the test area – and the plug returns to proper size and inflation pressure, which results in a safer operation. Because the redesigned test plugs with pressure relief valves prevent over-inflation, life expectancy of the product is increased substantially. Test-Tite now offers test plugs with a pressure relief valve in sizes up to 24".

- **Standard and long pneumatic plug styles**
- **Available in 1 1/2" – 15" sizes for plumbing applications**
- **No moving parts to fail, malfunction, or plug**
- **Three-year limited warranty**
- **Full product listing on page 118**

## Test-Tite® Deep Techno-Caps

The Deep Techno-Cap offers users reassurance that there will be plenty of surface to solvent weld the cap to the pipe – even if the pipe is cut at a slight angle. An affordable option versus heavy-duty sch. 40 DWV end caps, flexible caps utilizing a hose clamp or metal wing nut test plugs, the Deep Techno-Cap also provides ample test performance for the most demanding residential applications – up to 5 stories or 22 psig.

- **Extra deep solvent weld socket**
- **Available in PVC or ABS**
- **Sizes 1 1/2" to 4" DWV**
- **Full product listing on page 128**

### AB&A™ High-Flow Classic Waste & Overflow

AB&A's new and improved, patent pending, Classic waste and overflow system keeps getting better. The newly designed, high-flow capacity Classic overflow cover plate is slotted to provide greater drainage through the tub overflow. Installers can easily secure the overflow elbow, gasket, and cover plate to the tub without the use of a screwdriver or screws. Test plugs and caps are always included with the Classic waste and overflow system.

- **Push-on overflow cover plate easily secures to the overflow elbow with no tools required**
- **High-flow capacity overflow cover plate allows water flow at approximately 7 gpm (typical tub valve = 5-6 gpm)**
- **Tool less installation**
- **Full product listing on page 157**

### Green Drain™ Waterless Trap Seal

When a trap primer fails, sewer gas, bugs, and unpleasant odors can enter the building through the drain. Green Drains' patented, easy to install design solves these common issues as water can freely pass down through the Green Drain, but gases, bugs, and odors are blocked by the one way seal. The Green Drain is easily inserted into the hub or the barrel of a new or existing drain.

- **Available in 2", 3", 3 1/2" and 4"**
- **Eliminates the need for chemical trap seal applications**
- **Compatible with most commercial cast iron drains**
- **Affordable and eco-friendly alternative to trap primers**
- **Can be installed in new or retrofit construction**
- **Perfect in areas where the floor drain receives irregular maintenance**
- **Full product listing on page 133**

**Green Drain™**

Waterless Trap Seal for Floor Drains

## Roof Top Blox® Adjustable Piping Support

The Roof Top Blox® is a revolutionary roof top support block system that works with height extension rods, support brackets, pipe rollers, strut, and more. The Blox is versatile enough for every roof plumbing support, roof piping support, and roof platform support need. In addition, the packaging makes transporting roof support blocks to the job – and roof top – a faster and more efficient process.

- **No roof penetration required**
- **One Blox, multiple configurations**
- **Suitable for any roofing material**
- **Install-from-the-top design allows for a quick install**
- **Supports gas piping, plumbing, HVAC, conduit, cable tray and mechanical equipment**
- **Full product listing on page 113**

## Studor® TRAP-VENT®

From the brand synonymous with Air Admittance Valves comes another AAV advancement: TRAP-VENT is a lavatory P-trap with an integral Air Admittance Valve. The compact design is the ideal plumbing solution for remodels, restorations and floating sinks.

- **Maintains a 2" trap seal**
- **Up to 6 DFUs**
- **Limited lifetime warranty**
- **Cladding available as an accessory**
- **Contact IPS for special finishes**
- **Full product details on page 193**

## Weld-On® Easy-Twist™ Can Opener

The Easy Twist™ is ergonomically designed to easily open the can in a simple twist without damaging the cap. When closing the can, Easy Twist™ helps tighten and seal the cap with an extra torque – this prevents solvent cements or primers from drying out.

- Made of durable stainless steel
- Flat-edge handle is used to open paint-style solvent cement cans
- For use on all Weld-On solvent cement and primer cans, except wide mouth gallon can
- Full product listing on page 29

## Dialysis Box with Stainless Steel Valves

Guy Gray Dialysis Boxes are now available with stainless steel valves. Designed for reverse osmosis and deionized water mixed with dialysate saline concentrate. Featuring sturdy, 316 stainless steel construction to prevent corrosion, the boxes are available with one or two supply valves, and contain a nominal 2" waste outlet.

- Access door and frame may be positioned in any convenient orientation; door includes concealed hinge and Cam Cylinder lock w/two keys
- Tailpiece waste connection is 2 3/8" OD Stainless Steel, Stainless Steel adjustable wall faceplate for a clean, sleek finish
- PVC valves are ball-style with EPDM seals and O-ring; .5" FPT Schedule 80; flushing nipple is included
- Equipment drain tube support is located directly over drain to eliminate splatter and minimize clean-up
- Full product listing on page 55

## 1954 – Weld-On® pioneered the solvent cement industry

The plastic piping era in the United States began with the introduction of Weld-On®'s first plastic pipe cement. Ever since, Weld-On cements, cleaners and primers have been delivering industry-leading performance and revolutionizing plastic piping assembly.

## Today's Weld-On® – a global leader in solvent welding technology

Recognized as the world's premium line of products for joining plastic pipes and fittings, today's Weld-On solvent cements, primers and cleaners meet low-VOC (Volatile Organic Compound) emission limits. These eco-friendly, plumber-friendly products are yet another industry first, from the industry's first plastic pipe cement provider.

**The first-ever washing machine outlet box manufacturer**

Starting with the original washing machine outlet box in 1958, the Guy Gray™ line has always featured innovative metal-box solutions to keep pace with an ever-evolving industry.

**Now the first choice for all metal outlet boxes**

What began as a handful of galvanized metal boxes is now an extensive, widely trusted product line – the industry’s No. 1 choice in metal outlet boxes. Guy Gray™ also offers a wide range of domestic valves and fire-rated boxes.

## Saving time and effort since 1969

The Water-Tite Washing Machine Recessed Outlet Box – the industry’s first plastic construction – standardized laundry connections in 1969. In 1978, Water-Tite’s recessed Ice Maker Outlet Box allowed contractors to save more time in the kitchen too.

## More labor-saving specialty products than ever

For more than 40 years, Water-Tite products have been helping plumbers reduce installation time while maintaining a high level of quality. Today, Water-Tite’s line includes a wide range of innovative, labor-saving specialty plumbing products. From roof flashings and residential drains to support systems and much more, Water-Tite has the products that help plumbers work faster and smarter.

Water-Tite offers a comprehensive line of Washing Machine Outlet Boxes, Handles, and Valve Connections for your installation needs. All Water-Tite and Guy Gray® valves comply with ASME A112.18.1. All integral hammer arrester valves also comply with ASSE1010. See the following pages for additional details on all of the components.

### DU-All™ 10 N 1® Dual-Drain Washing Machine Outlet Box

- Patented one-piece design speeds installation versus separate drain and valve boxes – Patent # 4,934,410
- Back of box rests against the back sheetrock wall for sturdy installation
- Solid one-piece construction with raised drip guard contains and directs leaks down the drain
- Various valve mounting options allow dual drain, right drain only, left drain only, bottom or top-mount
- Valves unassembled for contractor's mounting option
- Multiple drain options
- Flat box side for secure mounting to the stud
- EZ Out Test Caps are raised for easy removal and KOs are oversized so they won't fall down drain
- Textured, snap-on frame, with hot and cold supply designations embossed on the front, accommodates up to 1" drywall for a clean finish
- DU-All™ and Center Drain Econo Box faceplates are interchangeable
- Rough opening: 8 ¼" W x 6 ⅞" H x 3 ¾" D
- Faceplate dimension: 10 ⅜" W x 8 ⅜" H
- Extended mounting flange provided
- Faceplate unassembled in contractor packs

## Hammer Arresters

Ignoring water hammer can lead to costly damage within any plumbing system. Water-Tite "AA" Single Fixture Shock-Buster™ Hammer Arresters are the solution to eliminating water hammer in residential and light commercial supply lines. All our Hammer Arresters are manufactured to the highest standards that our customers have come to expect. Shock-Buster Hammer Arresters contain all the necessary approvals to pass code inspection in any territory. "AA" Hammer Arresters must be installed as close to the valve as possible; recommended to be no more than 6' from the valve being protected.

- "AA" single fixture size
- Guaranteed for the lifespan of the plumbing system
- UPC listed
- ASSE Certified to ANSI/ASSE 1010-2004 standard
- Approved for sealed wall installations with no access panel required
- May be installed at any angle
- Conforms to IPC Code

### Right Strap™ Multi-Functional Pipe Clamps

- Patent # 6,073,891
- Factory-assembled for half-clamp installation
- Installs 2 ways – half clamp, full clamp
- Allows for expansion and contraction of supply tubing
- For all metal and plastic 1/2", 3/4" and 1" copper tube size materials
- Greatly reduces the chance for noise common to overly restrictive systems
- Supports all CTS tubing
- No pinning, no binding, no complaints!

## Versatile, time-saving roof top support block system

The Roof Top Blox® is a revolutionary roof top support block system that works with height extension rods, support brackets, pipe rollers, strut, and more. The Blox is versatile enough for every roof plumbing support, roof piping support, and roof platform support need. In addition, the packaging makes transporting roof support blocks to the job – and roof top – a faster and more efficient process.

Engineered with contractors in mind, the Roof Top Blox system is designed to be quickly installed, expanded, and adjusted from just the top side. Easier installation and lasting dependability make Roof Top Blox the best roof block choice to specify or install for supporting pipes and mechanical equipment on flat commercial roofs.

## 40+ years of field-tested reliability

For more than four decades now, Test-Tite® products have featured a full range of pneumatic and mechanical test plugs. Plumbers worldwide have come to rely on Test-Tite time- and field-tested plugs, turning to them for use in residential, commercial, and underground markets.

## Test plugs, tools, hoses and more

Test-Tite pneumatic plugs come with a three-year warranty and include the full plumbing line of Pressure Relief Test Plugs up to 15" in diameter. Test-Tite mechanical plugs feature the all new patented Mechanical Cleanout Test Plug, as well as the Flush Cleanout Repair Plugs. The full Test-Tite product line also includes test caps, hoses and accessories.

**CATEGORY 11**

**Pressure Relief Pneumatic Test Plug NEW**

- Pressure relief automatically resets as the pressure in the plug vents below release pressure
- Pressure relief has no moving parts to fail or malfunction
- Molded as one-piece with no seams or bonded parts
- Pressure relief exhausts out of the top of the plug not into test area
- Works in place of "standard" pneumatic plugs
- Internal pressure relief device releases pressure when plug exceeds maximum pressure levels
- 5 sealing ribs in the center portion of the plug for positive sealing
- Three-year limited warranty
- Patents Pending
- 3" and 4" plugs are available with 48" long chains (bulk packs only). Contact IPS for availability

## Broader offering for plumbing wholesalers and contractors

IPS Corporation acquired the American Brass & Aluminum Foundry (AB&A™) in 2010. Since 1931, the AB&A™ product family has grown to include a full line of plastic and brass bath wastes, plastic, cast iron and brass plumbing drains and fittings, cleanouts, and associated accessories.

## High quality wastes and drains

Easy-to-install AB&A bath wastes are offered in an assortment of special finishes to complement today's designs and customer preferences. A wide range of lavatory, floor, and shower drains are available in plastic, bronze, or cast brass. Recognized for their consistent high quality, AB&A products are used in both new construction and retrofit markets.

**There's a reason everyone calls AAVs "Studor®" vents**

When Studor developed the first Air Admittance Valves in the 1970's, it was developing AAV technology that would become the standard. The technology provides Drainage Waste and Vent systems the option to reduce the number of vents through the roof and allows for only one open vent to the atmosphere per building system.

**Still the only specialized AAV manufacturer in the world**

Studor AAVs were introduced to the U.S. in 1986, and Studor engineers have been refining the technology ever since. Today, the Studor line of specialized AAVs is bigger than ever, offering the most complete AAV line on the market – with millions of valves installed in North America and worldwide.

#### MAXI-VENT®

The unique design of the Studor® MAXI-VENT® provides plumbing ventilation to prevent the loss of water seals in traps without the need for costly roof penetration and vent piping.

- Can be used as an individual, branch, circuit or stack vent
- Will vent up to 500 DFUs on a stack
- Fits 3" with no-hub type coupling
- Fits 4" with rubber gasket provided
- Reduces the number of fire-stopping applications
- ANSI/ASSE 1051, ANSI/ASSE 1050, NSF 14, Warnock Hersey, ICC-ES PMG-1025, C-IAPMO
- Exclusive vermin protection system
- Limited lifetime warranty for replacement of defective valves
- Residential or commercial use
- Expands architectural design limits

#### Recessed Air Admittance Valve Boxes

The unique design of the Studor® MINI-VENT® provides plumbing ventilation to prevent the loss of water seals in traps without the need for costly roof penetration and vent piping.

- Can be used with any MINI-VENT®, TEC-VENT® or REDI-VENT®
- Fire-rated box does not come with an AAV
- Can also be used as the termination point for an open pipe side wall vent as an alternative to venting through the roof

#### P.A.P.A.®

The Studor® P.A.P.A.® is the perfect compliment to the existing range of Studor Air Admittance Valves (AAVs). Together they form the Studor Single Pipe System (SSPS), a Total Solution to a building's venting requirements.

Studor Air Admittance Valves will protect the water seal of the system's branch fixtures while the P.A.P.A. effectively deals with positive pressure. This combination maintains perfect system balance, quickly and efficiently restoring even atmospheric pressure conditions throughout the system thus avoiding siphonage of any trap.

The Advantages:

The Studor P.A.P.A. as part of the complete Studor System

- Provides complete protection against positive pressures in the system
- Replaces extensive vent piping saving material and installation costs
- Provides greater freedom of design for engineers, architects and design professionals
- Reduces the need for fire stopping devices preventing the chimney effect in the pipes, reducing the risk of fire spreading upwards between floors
- ASSE Standard # 1030-2013
- Eliminates leak prone roof penetrations –only one roof penetration is required no matter how tall the building
- Can be retrofitted into an existing drainage system to solve positive pressure problems
- Prevents propagation of odorous sewer gases
- Requires no maintenance, as all Studor products are non-mechanical devices
- Is guaranteed for a lifetime equivalent to that of the drainage system in which it is installed

#### TEC-VENT®

Simplify drainage and waste venting with the air admittance valve designed specifically for commercial applications.

The unique design of the Studor® TEC-VENT® provides plumbing ventilation to prevent the loss of water seals in traps without the need for costly roof penetration and vent piping.

- Classified in accordance with UL2043 for installation in plenums when the system is designed by a design professional and approved by local inspector
- Manufactured from flame-retardant polycarbonate resin
- High tensile strength
- Will vent up to 160 DFUs
- Exclusive vermin protection system
- Expands architectural design limits
- Reduces the number of fire-stopping applications
- UV rated for outside installations
- Limited lifetime warranty for replacement of defective valves
- Residential or Commercial Use
- ANSI/ASSE 1051, ANSI/ASSE 1050, NSF 14, Warnock Hersey, UL 2043, ICC-ES PMG, C-IAPMO, ICC-ES-PMG-1025

### CHEM-VENT®

Simplify drainage and waste venting with the air admittance valve designed specifically for chemical waste systems.

The unique design of the Studor® CHEM-VENT® provides plumbing ventilation to prevent the loss of water seals in traps within chemical waste systems.

- Can be installed in chemical waste systems when the system is designed by a design professional
- **WARNING!!** Studor CHEM-VENT® cannot be installed in applications where vented fumes are required to pass through biological and/or chemical filters before being released to the atmosphere
- Will vent up to 6 DFUs
- Exclusive vermin protection system
- Expands architectural design limits
- ASSE 1049, NSF 14
- Manufactured from Flame Retardant Polypropylene conforming to ASTM D-4101
- The Sch 40 dimensions of the valve tail piece allows direct mounting on any fusion or MJ fitting
- Through the use of readily available adapters, the valve can also be connected to CPVC, glass and Duriron® systems (designer to check for chemical comparability)
- Limited lifetime warranty for replacement of defective valves
- Commercial use

### MAXI-FILTRA®

The Studor® MAXI-FILTRA® operates as a two-way vent, which filters air in both directions. Its replaceable active carbon filter is designed to eliminate bad odors produced by the plumbing drainage system.

The MAXI-FILTRA is for outdoor use only, particularly for use with septic systems, but can also be installed on existing open vent pipes and in systems in which air admittance valves (AAVs) are installed.

- Can be installed vertically or horizontally
- Contains replaceable carbon filter that can last up to two years
- Outdoor use only
- Fits 3" with no-hub type coupling
- Fits 4" with rubber gasket provided
- UV Rated
- Studor recommends the use of the MAXI-CAP when installing the MAXI-VENT outdoors

#### Basin Guard™

Basin Guard® is an ADA-compliant undersink piping enclosure for kitchen, classroom and lavatory sinks. Basin Guard can be installed where ever counter tops and sidewalls are present and the proper ADA sink is installed. Provides an attractive way to conceal piping and mechanical connections. Bottom opening allows for easy service access.

- ADA-conforming design protects wheelchair users from scalding and sharp, abrasive surfaces. When installed, all plumbing and mechanical components are concealed
- Strict code compliance minimizes risk. The Basin Guard complies with ADA article 4.19.4, California Plumbing Code 1504.2.1, ANSI A117.1, BOCA P 1203.4, and other state and local regulations. Basin Guard also has a flammability resistance, tested in accordance with Underwriters Laboratories for the UL 94 standard with a V-0 rating
- 36" and 42" enclosures are easy to specify, stock and install. May be used with virtually any ADA-compliant sink or restroom lavatory where countertops and sidewalls are present
- High-impact, UV-protected vinyl maximizes product life cycle. The Basin Guard is molded from impact-resistant, stain-resistant and chemical-resistant protective vinyl for durability, safety and long life
- Can be packaged up to 4 per box. Specify quantity when ordering

## Soft Guard Plus™

Soft Guard Plus™ provides undersink pipe protection that should be specified for installation to all drainage piping including hot and cold water valves and supplies under lavatories to meet ADA compliance. Soft Guard Plus features a base material that has been tested in accordance with testing standard ASTM E84-07 with a 25 flame spread/450 smoke index and a 1/8" soft PVC vinyl material to maximize ADA and UPC compliance.

- 25 Flame/450 smoke index
- Anti-microbial finish
- Hook and loop fastening system
- Available in white or black
- Optional snap-to-lock fasteners provide tamper resistance
- Buy American Act Compliant
- Fits Sch. 40 P-traps and flexible braided hoses
