

# Safety Data Sheet

#### FOR REGULATORY AND SDS QUESTIONS (U.S. AND CANADA): CALL THE PRODUCT STEWARDSHIP LINE 1- 908-791-2336 9 AM TO 6 PM ET (Mon-Fri)

### Section 1. Identification

| Product name                   | : ALPHI 11 5 GALLON |
|--------------------------------|---------------------|
| Product code                   | : 155738-0005       |
| Product type                   | : Liquid.           |
| Date of issue/Date of revision | : April 28 2021.    |

| Manufacturer - Supplier   | Telephone no.: | Emergency phone:                       |
|---|----------------|--|
| FERNOX Americas<br>4100 6th Avenue<br>Altoona, Pennsylvania 16602<br>www.fernox.com |                | DOMESTIC NORTH AMERICA<br>202-464-2554 |

### Section 2. Hazards identification

| OSHA/HCS status                            | : While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product. |
|--|--|
| Classification of the substance or mixture | : Not classified.  |
| GHS label elements                         |  |
| Signal word                                | : No signal word.  |
| Hazard statements                          | : No known significant effects or critical hazards.  |
| Precautionary statements                   |  |
| Prevention                                 | : Do not eat, drink or smoke when using this product.  |
| Response                                   | : Get medical attention if you feel unwell.  |
| Storage                                    | : Keep container tightly closed. Store in cool/well-ventilated place.  |
| Disposal                                   | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Hazards not otherwise<br>classified        | : None known.  |

### Section 3. Composition/information on ingredients

| Subs | stance | /mi | xture |
|------|--------|-----|-------|
|      |        |     |       |

: Mixture

| Ingredient name  | %      | CAS number |
|------------------|--------|------------|
| propane-1,2-diol | 80-100 | 57-55-6    |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

Continued on next page

### Section 3. Composition/information on ingredients

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| <b>Description of</b> | i necessary | first aid measures |
|-----------------------|-------------|--------------------|
|                       |             |                    |

| Eye contact  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Get medical attention if irritation<br/>occurs.</li> </ul>   |
|--------------|---|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.   |
| Skin contact | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>  |
| Ingestion    | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |

| Most important symptoms/effects, acute and delayed                                   |   |  |
|--|---|--|
| Potential acute health effect  | <u>ts</u>   |  |
| Eye contact  | : No known significant effects or critical hazards.   |  |
| Inhalation   | : No known significant effects or critical hazards.   |  |
| Skin contact   | : No known significant effects or critical hazards.   |  |
| Ingestion  | : No known significant effects or critical hazards.   |  |
| Over-exposure signs/symp   | <u>toms</u>   |  |
| Eye contact  | : No specific data.   |  |
| Inhalation   | : No specific data.   |  |
| Skin contact   | : No specific data.   |  |
| Ingestion  | : No specific data.   |  |
| Indication of immediate medical attention and special treatment needed, if necessary |   |  |
| Notes to physician   | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |  |
| Specific treatments  | : No specific treatment.  |  |
| Protection of first-aiders   | : No action shall be taken involving any personal risk or without suitable training.  |  |
| See toxicological informatio   | n (Section 11)  |  |

# Section 5. Fire-fighting measures

| Extinguishing media                        |  |
|--|--|
| Suitable extinguishing media               | : Use an extinguishing agent suitable for the surrounding fire.                                    |
| Unsuitable extinguishing media             | : None known.  |
| Specific hazards arising from the chemical | : In a fire or if heated, a pressure increase will occur and the container may burst.              |
| Hazardous thermal decomposition products   | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide |
| Continued on next page                     |  |

| Special protective actions<br>for fire-fighters   | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
|---|---|---|
| Special protective<br>equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                         |

### Section 6. Accidental release measures

| Personal precautions, protect  | equipment and emergency procedures   |      |
|--------------------------------|--|------|
| For non-emergency<br>personnel | lo action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>Intering. Do not touch or walk through spilled material. Put on appropriate personal<br>rotective equipment.  | I    |
| For emergency responders       | specialized clothing is required to deal with the spillage, take note of any informatio<br>Section 8 on suitable and unsuitable materials. See also the information in "For non-<br>mergency personnel".   |      |
| Environmental precautions      | woid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>ollution (sewers, waterways, soil or air).  |      |
| Methods and materials for co   | nment and cleaning up  |      |
| Small spill                    | top leak if without risk. Move containers from spill area. Dilute with water and mop<br>water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material a<br>lace in an appropriate waste disposal container. Dispose of via a licensed waste<br>isposal contractor.  |      |
| Large spill                    | Stop leak if without risk. Move containers from spill area. Prevent entry into sewers,<br>vater courses, basements or confined areas. Wash spillages into an effluent treatm<br>lant or proceed as follows. Contain and collect spillage with non-combustible,<br>bsorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in<br>ontainer for disposal according to local regulations (see Section 13). Dispose of via<br>censed waste disposal contractor. Note: see Section 1 for emergency contact<br>information and Section 13 for waste disposal. | ient |

# Section 7. Handling and storage

| Precautions for safe handling                                      |  |
|--|--|
| Protective measures  | : Put on appropriate personal protective equipment (see Section 8).  |
| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe<br>storage, including any<br>incompatibilities | : Storage temperature: 5 to 40°C (41 to 104°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

### Section 8. Exposure controls/personal protection

#### Control parameters

**Occupational exposure limits** 

| Ingredient name                    | Exposure limits   |  |  |
|------------------------------------|---|--|--|
| propane-1,2-diol                   | AIHA WEEL (United States, 10/2011). Notes: 2004 Revised<br>Document<br>TWA: 10 mg/m <sup>3</sup> 8 hours.   |  |  |
| Appropriate engineering controls   | : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.  |  |  |
| Environmental exposure<br>controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |  |  |
| Individual protection meas         | ures  |  |  |
| Hygiene measures                   | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |  |  |
| Eye/face protection                | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |  |  |
| Skin protection                    |   |  |  |
| Hand protection                    | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.   |  |  |
| Body protection                    | <ul> <li>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before<br/>handling this product.</li> </ul>   |  |  |
| Other skin protection              | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |  |  |
| Respiratory protection             | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |  |  |

### Section 9. Physical and chemical properties

**Appearance Physical state** : Liquid. Color : Colorless. : Aromatic. [Slight] Odor **Odor threshold** Not available. pН : 6.9 **Melting point** : Not available. **Boiling point** : Not available. : Closed cup: >93.333°C (>200°F) **Flash point Evaporation rate** : Not available. Flammability (solid, gas) : Not available.

Continued on next page

| Lower and upper explosive (flammable) limits | : Not available.  |
|--|---|
| Vapor pressure                               | : Not available.  |
| Vapor density                                | : Not available.  |
| Relative density                             | : 1   |
| Solubility                                   | : Soluble in the following materials: cold water and hot water. |
| VOC  | : 957.4 g/l   |
| Partition coefficient: n-<br>octanol/water   | : Not available.  |
| Auto-ignition temperature                    | : Not available.  |
| Decomposition temperature                    | : Not available.  |
| Viscosity                                    | : Not available.  |
| Aerosol product                              |   |
|  |   |

### Section 10. Stability and reactivity

| Reactivity                              | : No specific test data related to reactivity available for this product or its ingredients.  |
|---|---|
| Chemical stability                      | : The product is stable.  |
| Possibility of hazardous<br>reactions   | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Incompatibility with various substances | : Slightly reactive or incompatible with the following materials: oxidizing materials, reducing materials, combustible materials, organic materials, metals, acids, alkalis and moisture. |
| Hazardous decomposition<br>products     | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |
| Hazardous polymerization                | : Under normal conditions of storage and use, hazardous polymerization will not occur.  |

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
