

ROHL FIRECLAY SINKS

Authentic Luxury for Kitchen and Bath®

ROHL.
Authentic Luxury for Kitchen and Bath®

Authentically crafted fireclay sinks are made of a unique clay capable of being fired at extremely high temperatures. These high temperatures cause the clay and glaze to fuse together, virtually creating an entirely new form. This clay is found in limited regions around the world, making true fireclay sinks some of the most durable sink options. Resistant to acid, alkali, scratches and impact, many fireclay sinks outlive the very spaces for which they were created. ROHL's fireclay sinks are crafted with environmentally friendly materials and are completely lead free and recyclable.

Suggested Installation Tips for your new Shaws Original Apron Front Sink

- Dimensions are plus or minus 2%. Inspect your sink. No two sinks are alike and you should inspect your sink upon delivery. The sides and top of the sink should be square within the 2% tolerance. The bottom of the internal sink bowl is designed flat with a slight graduated drain. Testing the sink for drainage is recommended. Shimming the sink may be needed to drain properly.
- The installation should be for new construction only to hold a 190 lb. sink and water.
- The most common installation design is undermounted below the solid surface.
- Design the sink counter top to leave room for the installation of faucets and accessories.
- Design the cabinet frame separately from the cabinet fascia. The support frame or base should be designed to support the sink on the sides and the back. The cabinet trim that frames the sink can then be custom fit around the corners.

SHAW'S FIRECLAY SINKS

PAGE 3

In 1897, the apron sink was introduced by Shaws of Darwen, England. Today, every Shaws Original fireclay sink is still hand poured and shaped and stamped with the name of the artisan who created it. Our authentic apron sinks resist acid, alkali, scratches and impact, making them as versatile and durable today as they were a century ago.

ALLIA FIRECLAY SINKS

PAGE 5

Since 1892, Allia Fireclay Sinks have been made in world-renowned Limoges, France – the region best known for the making of fine porcelain tableware. Exclusively from ROHL, Allia Fireclay Sinks are as durable as they are beautiful. Each sink is covered with a thick layer of luminous glaze fired at 2,264°F, which fuses with the clay to provide an exceptionally strong, hard surface that is stain and chip resistant..

White

Biscuit/Pergame

Matte Black (Allia only)

AVAILABLE FINISHES

Shaws Original Sinks are available in White and Biscuit, while Allia Sinks are available in White, Pergame (Biscuit) or Matte Black. Both are made of genuine fireclay, a natural material that will never rust, and finished with a glaze that repels stains, scratches and dings.

SHAW'S CLASSIC

Each sink in the Shaws collection is handmade according to its 1897 design. Shaws' traditional designs tend to be flat. To avoid water spotting, wipe down the internal sink bowl bottom after use. Waxing the sink will encourage drainage. Dimensions are plus or minus 2%.
