ECCO POLYPROPYLENE VENT™ SINGLE WALL RIGID VENTING

INTRODUCTION

Specifications

- Specially developed fire retardant polypropylene
- Resistant up to 248°F (120°C)
- Operates in negative and positive pressure modes
- 2" (60 mm) and 3" (80 mm) diameters available in white
- 4" (110 mm), 5" (125 mm), 6" (160 mm), and 8" (200 mm) available in grey
- System approval 20" of water column or 5000 Pa (0.725 psi)

Advantages

- Complete product line in polypropylene
- Long lasting, lightweight, and easy to install
- Resistant to aggressive condensate water, reducing contaminant pollution of the boiler

Safety

To ensure installation is and remains completely sealed tight, a locking clamp must be used at all connections. For correct installation of the clamp, the installation instructions should be followed. Only if these instructions are followed can a safe and gas tight installation be guaranteed. Use ECCO Polypropylene Vent™ lubricant exclusively for installing ECCO Polypropylene Vent™ to ensure a reliable and safe connection.

Environment

- Less CO₂ is produced in manufacturing polypropylene flue gas systems compared to traditional metal flue gas systems.
- Completely recyclable

Installation

- Certified to ULC-S636 standard for Class IIC rating (exhaust temperatures up to 230°F (110°C)).
- Certified diameters are 2" (60 mm), 3" (80 mm), and 4" (110 mm) residential; 5" (125 mm), 6" (160 mm), and 8" (200 mm) commercial.
- ECCO Polypropylene Vent™ is a vent system for type BH gas venting, for use with ANSI Category II and IV gas burning appliances (condensing heating appliances) with a maximum flue gas temperature of 230°F (110°C).
- Sealings are made of EPDM
- Appliances can be operated immediately upon the completion of ECCO Polypropylene Vent™ installation.
- Vent pipe is rated to a maximum of 20" of water column, or 5000 Pa (0.725psi)
- Maximum flue gas temperature is 230°F (110°C) for ULC-S636 compliant installation – guaranteed up to a maximum flue gas temperature of 248°F (120°C).
- Minimum clearance to combustibles is 0"
- Unless approved by the appliance manufacturer, only one appliance may be attached to the vent system.
- Do not use ECCO Polypropylene Vent™ with any other manufacturer's vent components – it must be used exclusively throughout the entire vent system.
- Installation must conform to all relevant local, State, Provincial or National codes.

ECCO POLYPROPYLENE VENT™ SINGLE WALL RIGID / FLEX VENTING

PIPE LENGTHS

Rigid Polypropylene pipe length with integrated gasket. The male end of the pipe can be cut to shorten length if required.

2" and 3" Diameter

Pipes are non-UV resistant white polypropylene.

ECCO POLYPROPYLENE VENT™ SINGLE WALL RIGID / FLEX VENTING

LOCKING CLAMPS – PLASTIC

With this locking clamp you can create an extra pull safe connection in just a few seconds. Furthermore, this product can be used when installing a plastic flue gas outlet system in a shaft.

- Made from high quality UV-resistant unbreakable Polypropylene
- Easy to close and re-open for repositioning
- Resistant up to a flue gas temperature of 120°C (248°F)

2" – 4" Diameter

ITEM #	MODEL #	DIAMETER (")	CTN/QTY
190220	2PPLC	2	12
190320	3PPLC	3	12
190420	4PPLC	4	12

LOCKING CLAMPS – GALVANIZED

The locking clamp allows for up to 3/8" (10 mm) of thermal expansion at each joint, which is required for safe installation of polypropylene venting systems.

A locking clamp is required at each joint to secure connections between pipes and fittings.

5" – 8" Diameter

ITEM #	MODEL #	A (")	CTN/QTY
190520	5PPLC	5	12
190620	6PPLC	6	6
190820	8PPLC	8	6

SUPPORT BRACKETS

Used to support single wall venting systems in vertical or horizontal configurations.

Maximum Support spacing:

Vertical: 78"

Horizontal: Ø2" = 19" / Ø3" - Ø8" = 39"

ECCO POLYPROPYLENE VENT™ SINGLE WALL RIGID / FLEX VENTING

TWIN PIPE WALL TERMINATION KITS

Used to terminate two single wall rigid pipes through an exterior wall. This kit does not include UV pipe lengths to provide the ability to use various lengths depending on the installation application. Additional UV pipe lengths and elbows can be added outside the building to extend or redirect intake and exhaust as needed. Separate plates allow for the termination kit to be configured to satisfy installation and code requirements.

Kit Includes

- (2) Exterior Wall Plates (black)
- (2) Interior Wall Plates (white)
- (2) Wire Bird/Rodent Guards

ECCO POLYPROPYLENE VENT™ SINGLE WALL RIGID / FLEX VENTING

ECCO POLYPROPYLENE VENT™ SINGLE WALL FLEXIBLE VENTING

INTRODUCTION

Specifications

- Manufactured from flame retardant polypropylene
- Resistant up to 248°F (120°C)
- Operates in negative and positive pressure modes
- Not UV resistant
- Designed as a vertical flue system installation, but is safe to run at angles up to 45° from vertical
- Available in nominal diameters of 2" (60 mm), 3" (80 mm), and 4" (110 mm)
- Available in white
- System approval 20" of water column or 5000 Pa (0.725 psi)
- Flexible
- Specially designed for venting condensing gas heating appliances
- Ideal for use within service ducts or existing chimney shafts where internal angles or bends figure in the flue route

Advantages

- Easy to install
- Coupling connectors which allow easy joining of shorter lengths, virtually eliminating waste
- Low weight system
- Compact packaging due to great flexibility
- Wide range of accessories

Safety

For safe installation of the ECCO Polypropylene Vent™ Flexible Venting System, please refer to the installation instructions.

Environment

- Less CO₂ is produced in manufacturing polypropylene flue gas systems compared to traditional metal flue gas systems.
- Completely recyclable

Installation

- Certified to ULC-S636 standard for Class IIC rating (exhaust temperatures up to 230°F (110°C)).
- Certified diameters are 2" (60 mm), 3" (80 mm), and 4" (110 mm)
- ECCO Polypropylene Vent™ is a vent system for type BH gas venting, for use with ANSI Category II and IV gas burning appliances (condensing heating appliances) with a maximum flue gas temperature of 230°F (110°C).
- Installation must conform to all relevant local, State, Provincial or National codes.
- Guaranteed up to a maximum flue gas temperature of 248°F (120°C)
- Maximum allowable deflection (bend) of the flexible vent is 45°, so that condensate does not collect in the corrugations.
- Appliances can be operated immediately upon the completion of ECCO Polypropylene Vent™ installation.
- Vent pipe is rated to a maximum of 20" of water column, or 5000 Pa (0.725psi).
- Minimum clearance to combustibles is 0"
- Unless approved by the appliance manufacturer, only one appliance may be attached to the vent system.
- Do not use ECCO Polypropylene Vent™ with any other manufacturer's vent components – it must be used exclusively throughout the entire vent system.

ECCO POLYPROPYLENE VENT™ SINGLE WALL RIGID / FLEX VENTING

FLEX RELINING KITS

Used when a masonry chimney is relined with flexible polypropylene vent. The cap is designed to suit direct vent configurations. If code permits, the existing masonry flue can be utilized as a pipe for supply air. Flex available separately.

Kit Includes

- (1) Chimney Cap
- (5) Flex Spacers
- (1) Support Elbow and Bracket
- (1) Male Adapter
- (1) UV Pipe with Flex Connection
