Flex Connectors

Flex Connectors are primarily designed for installation in pump suction and discharge lines, to prevent damage to equipment caused by vibration and pipe misalignment. The flex connectors are hose assemblies manufactured from braided corrugated metal hose and are available in bronze, stainless steel and Monel. Flex connectors are available with a smooth bore Teflon liner. End fittings include flanges, MPT and sweat. Working pressures range from full vacuum through 12,000 psi. Temperatures up to 1500°F. Standard sizes range from 1/4" through 18" I.D. A variety of size, length and end fitting configurations are available. Standard and special assemblies are available and built to customer specifications.
