

Sentry™ Refrigerant Locking Cap

APPLICATION

Sentry™ Refrigerant Locking Caps meet the International Residential Code (IRC) and International Mechanical Code (IMC) requirement that all outdoor access ports on A/C and refrigerant equipment must be tamper resistant. Sentry Locking Caps safeguard against refrigerant theft and inhalant abuse. These locking caps are anodized in industry color codes for easy identification and prevent accidental mixing of refrigerant gases.

ADVANTAGES

- Meets IRC® M1411.6 & IMC® 1101.10 for tamper resistance: Refrigerant circuit access ports located outdoors shall be fitted with locking-type tamper resistant caps
- Deters refrigerant theft and inhalation abuse with tamper resistant cap design
- For use with all refrigerants, including R22, R404A, R410A, HFC, HFO, A2L and other refrigerants.
- Weatherproof anodized aluminum casing with threaded brass insert
- An O-ring is pre-installed to seal the line and minimize leaks, compatible with all refrigerant types
- The universal key RSC-TOOL fits all major refrigerant safety caps from a variety of manufacturers -stop hunting around for the key you need on the jobsite. Also, available separately.
- Universally recognized color-coded caps use red for R410, and green for R22 systems.
Green for R22
Red for R410a
Silver for Universal
