

TOUCHLESS KITCHEN FAUCETS

Shown with:
Shaws® Shaker™ apron front kitchen sink

Available collections:
Armstrong™
Georgian Era™
Holborn™

Available finishes vary by collection

There is no longer a need to compromise design for functionality – enjoy both with flawless function in a beautifully wrapped package. The Perrin & Rowe® touchless technology allows you to turn water on and off with the motion of your hand. Touchless activation minimizes cross-contamination, improving the overall wellness of the kitchen. In addition, the peripheral position of the sensor minimizes false starts and optimizes water usage. Touchless technology is available in the traditional Georgian Era™, transitional Armstrong™, and modern Holborn™ Pull-Down Kitchen Faucet Collections, thus offering a design for every décor.
