

STRUT CHANNEL T-BOLT

550-2TA

Strut Dam™

SPECIFICATION

Sioux Chief Strut Dam shall be used where necessary to provide a barrier preventing TouchDown II Strut Clamp from slipping when installed in vertically mounted strut channel. The Strut Dam shall consist of one T-bolt, one washer, and one 3/8" square nut. Materials shall be zinc-plated to prevent corrosion.

INSTALLATION

Loosen the square 3/8" nut. Insert base of T-bolt into standard 1-5/8" channel making sure it is positioned below the TD-II Strut clamp. Secure Strut Dam by tightening nut.

MATERIALS

Zinc-plated steel

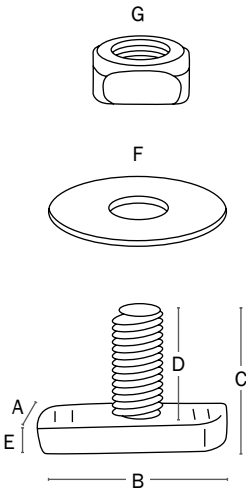

DIMENSIONS

- A:** Width 3/4"
- B:** Length 1-5/16"
- C:** Height 1"
- D:** Bolt height 3/4"
- E:** Base height 1/4"
- F:** Washer diameter 1-1/4"
- G:** Square nut 3/8–16
